My dear

Sub: **APOLOGY LETTER**

I would like to send across my apologies for using **hard word** to all my lovable friends. I have been in Hatsun for past 20 years which is more professional and strict discipline concern. When I meet you all you guys , I was become more emotional since I like more informal way of life which **I take it granted** .I can make a point which I feel uneasy or not good in professional way instead of writing in hard way .

Another point **which kills** me for past 10 months is Topic about **old crush's** I don't feel anything bad if it's done lighter way but my friend Mr vengatesh take it in deeper way by writing stories and other related thing which is hard to digest since the person may be his friend but he forget that she is wife of admirable & awesome person and also mother of two beautiful amazing daughter which can be explained in professional manner **but not in hard way as I did**. I request Maheswari madam not to encourage such things in the group.

I have **big dream or mission** in my mind that can be accomplished only with this group since my business is not associated with the farmers .Every night when I go to bed it **ping me** "do something for them "and I will start my work once Dhanvarsh settled in the college.

Finally I conclude that **I won't use any hard words or abusive** as Raj told in group forum but I will speak in more professional way as I am doing in my regular business.

I will request you all to ping me when you cross Madurai and **doors of my Hut** will open for all my lovable friends

Thanks
